SUNRISE SOLAR

A Product Brand of an ISO 9001:2008 Certified Company

About Us

Established in the year **2001**, We-**Krishna Solar House** a widely known concern engaged in supplying a diverse range of solar equipment manufactured under the Brand **Sunrise Solar (A Product Brand of Krishna Solar House)**. Our solar products are of the highest quality standards. Looking at the fact how useful is the solar energy unlike others, we have specialized ourselves in supplying a range of solar products like solar street light, solar home light system, solar tubular batteries and other electronic devices, manufactured out of latest technology and are tested from the manufacturing site itself. The products are provided with thorough check before they are sent for final delivery. The products are delivered as per the allotted timings of our clients. We ensure that we have all the facilities be it logistics, transportation, warehouse or packaging and other facilities. The equipment serve to a wide requirements of industries, hospitals, construction and many more. So far, we have supplied for a number of government as well private projects. We ensure that certain products (**BOS**) apart from Solar PV Module are procured from certified manufacturers like **BHEL, EXIDE, REMI** and others to complete the System. We have been continuously serving **PAN INDIA**, with all our dedication and efficiency in supplying products/materials at competitive price, with our strong distribution network thereby, occupying major chunk of the market.

The solar energy initiative of **Sunrise Solar** aims to bring solar energy systems and solutions primarily to remote and rural areas and bring about a transformation in the quality of life. As part of this initiative, **Sunrise Solar** is developing and offering a range of products, systems and solutions - from Solar PV Modules, Solar Home Light System, Street Light System, Solar Power Pack to Solar Fans - all based on solar energy. These products systems and solutions are part of the downstream component of the solar value chain. The unit has the capability to make modules of different ratings up to 250 Watts.

Our farsighted Objectives

Aim: We aim to meet our customer's requirement by supplying them with quality products at competitive price.

Vision: We always visualize ourselves to satisfy our clients by offering them with certified products thereby making the environment cleaner and greener for the benefit of the society.

Mission: We put our constant approach for using the latest techniques in our delivery process to meet our customers requirement thereby, offering them world class products at competitive price to reach the highest standard of ethics in the global market.

Product Profile

- Solar Photovoltaic Modules
- Solar Home Lighting System
- Solar Street Light System
- Solar Tubular Batteries
- Solar DC fans
- Solar Power Packs

Our Associate

Our range of products are procured from an ISO 9001:2000 certified company BHEL-A Government of India undertaking , commenced the manufacture of Solar PV cells and modules in 1983.BHEL's entry into the photovoltaic scene has been in line with its commitment to the development and manufacture of various forms of power generation equipment. As the largest manufacturer of power generation equipment in India,BHEL has also been in the forefront of promoting the alternate source of energy like solar,wind,magnetohydrodynamics etc.

The Electronic Division of BHEL , where the photovoltaics are manufactured has been involved in the design and manufacture of sophisticated electronics and power semi-conductors since 1977. This expertise in the manufacture of power diodes and thyristors,along with the system engineering support,has enabled BHEL to make rapid strides in the design,development and manufacture of photovoltaic modules and systems.Various systems ranging from power supplies for gas detection and telemetry system on un-manned offshore plat forms,to grid interactive power plants for rural as well urban areas have been developed by BHEL.

Exide Industries Limited is a giant in the storage battery industry-is also the largest power storage solutions company in south and south east Asia.The company manufactures a wide range of storage batteries from 2.5 Ah to 20,400 Ah capacity , covering all sectors..... telecom,power,automotive,non conventional energy etc. Exide network spreads throughout the country and we are apart of it.For over 85 years, Exide Industries Limited , has pioneered battery technology in India. It is the only company in the country to design and manufacture batteries from 2.5 Ah - 20,400 Ah in conventional flooded and VRLA design. Technology, innovation, quality and country-wide service network are the four pillars on which Exide achieves its high pedestal.

REMI Fans Limited (RFL), a leader and innovator in offering an array of high speed portable fans from 150mm to 450mm, D.C fans, decent and designer COMPAIRE ceiling fans and solar fans with low voltage consumption. Since inception, RFL has pioneered smarter ways for circulating fresh and cool air indoors. With changing trends, RFL has enhanced its product design from classic to contemporary for meeting different customer preferences in terms of colour, material, design, functionality and durability. **RFL** applies an unparalleled approach for designing, engineering and manufacturing different varieties of high-quality fans.

RFL's professional team pays meticulous attention to every minute detail from finalising the design components, manufacturing the final product to ease of installation. Fulfillment of these specifications during product development produces high quality fans offering unprecedented performance for years.

Our product features like adjustable fan speed and direction are easy to perform and effective in offering a soothing environment at home, office or any other indoor space. Over the years, **RFL** has made a mark in the market for providing optimum fan designs offering absolute comfort to the users. You are just a switch away from fresh air...Experience refreshing ambience and complete comfort with REMI Fans.

Procuring & Warehousing

The whole work starts with the procurement of the products. The responsibility of safe procurement is efficiently done by our procurement specialists. The concerned specialists take the well tested and checked product from the manufacturing site. The products so procured are re-inspected from the site itself. We ensure that the quality is retained in the same condition in which we receive from the manufacturer. Once the products are procured, they are brought and stored into well equipped warehouse. All the favourable conditions are well-maintained for keeping the products safe. The products are kept in correct alignment so as to make space for other products.

Logistics & Transportation

Our process of delivering the products is taken as a responsible job of logistics and transportation personnels. These personnels take the whole initiative of delivering the products in the specified time.

Various factors of the safe delivery is taken into consideration such as:

- Location
- Mode of transit
- Medium of transit
- Proper distribution of the products

Team & Management

Our team is the niche of our company. With supporting team like ours, we are sure to go high in our business. Amongst our teammates, we have procurement specialists, logistics personnels, transportation professionals. Other than these we have with us warehouse keepers, sales and marketing representatives and other skilled workmen. The teammates ardently work for the company, which is why we are able to serve so well. They put their judicious efforts in all the activities. Through their years of experience, we have successfully become an established name in the market.

Sales & Distribution

We have a well knitted network of sales and distribution. The network is so well coordinated that we are far more accessible and marketable. We have a team of expert sales, marketing and distribution professionals. Through their effective market studies, we are able to understand the client's requirements in a better manner. Our strong presence in the market of Bihar, U.P and Jharkhand makes us a preferred company to work with.

Areas We Cater To

Our wide range of solar equipment is vastly served for a number of usage.

Following are some areas wherein, we supply our products:

- Building & Construction
- Hospitals
- Commercial Complexes
- Industrial application
- Residential Townships
- Government Projects

Have a question? Need help?

Our team is ready to answer your questions and help in anyway! Please CALL, EMAIL or FILL IN the ENQUIRY FORM and a representative will get back to you!
